## Our Core Belief

Ensuring that patients have secure access to a dependable **supply of quality-tested, pure, accurate, and reproducible medicinal cannabis products.**

## Our Commitment

We are committed to leading, legitimizing, and shaping the future of our industry, aspiring to become the world's most trusted and **valued medicinal cannabis company.**

## Our Expertise

The group is at the forefront of advancing **medical cannabis research, cultivation, processing, and distribution** on a global scale.

## Our Mission

Our primary mission is to provide access to **high-quality natural** care that enhances **the quality of life for patients.**

**Pharmserv** is an API trading company headquartered in Stansstad, Canton Nidwalden. As pioneers in the distribution of cannabis-based pharmaceutical preparations, we have established a prominent presence in both the Swiss and European pharmaceutical markets.

With over two decades of expertise in marketing and **distributing GMP certified APIs**, our group serves as a preferred partner for your medical cannabis needs.

Holding **GMP licenses** for manufacturing, packaging, as well as **GDP and GID licenses**, we assure comprehensive and compliant solutions.

## Our Certifications

We are able to deliver products with garantie de l'identité/Geprüfte Identität (GID)\*

We are able to deliver certified product in compliance with good manufacturing practices (GMP)\*

We have the narcotic license in order to import , export and sell cannabis product with **more than 1% THC**

We are a pharmaceutical company registered at the Swiss Institute of Therapeutic Products

[LINK TO OUR PDF CERTIFICATION](#)

## **Access to controlled substances / Narcotics**

In order to have access to our controlled products/substances, you must possess an authorisation to purchase narcotic products.

# Northern Lights

Type of Cultivation: Greenhouse

**23%-25% THC**

**Northern Lights** is a hybrid strain resulting from the cross-breeding of Orange Bud and California Orange. These parent strains contribute to its unique characteristics and rich genetic background.

**Parent Strains :**

**1. Orange Bud**

Genetics: Skunk lineage

Characteristics: Known for its citrus aroma and uplifting effects, Orange Bud is a well-balanced hybrid that provides both mental and physical stimulation.

**2. California Orange**

Genetics: A classic hybrid with origin tracing back to the 1980's, California Orange is a balanced hybrid known for its sweet, citrusy flavor and moderate potency.

Characteristics: Offers a balanced effect that combines the best of both sativa and indica, providing a relaxed yet alert state of mind.

**Northern Lights** has a strong, sweet citrus aroma that is immediately recognizable. The dominant limonene terpene gives it a fresh, orange-like scent, while the presence of myrcene and caryophyllene adds depth with earthy and spicy undertones.

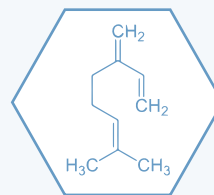

The flavor profile of **Northern Lights** is predominantly sweet and citrusy, reminiscent of freshly squeezed oranges. Upon inhalation, users experience a burst of orange flavor, followed by subtle notes of spice and earthiness. The smooth-smoke leaves a pleasant, tangy aftertaste.

Available quality : Ph. Euro (3028) / GID

Exemple CoA

TOTAL TERPENES  
**2.9%**

**DOMINANT TERPENES**

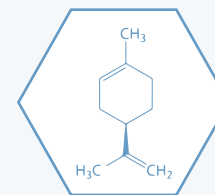

**Myrcene**

**Aroma & Flavor:** Earthy, musky, slightly spicy with sweet notes reminiscent of mango and clove.

**Effects:** Sedative, muscle relaxant, anti-inflammatory, analgesic.

**Uses:** Helps with relaxation, reduces pain and inflammation, promotes sleep, and enhances relaxation. It can also potentiate the effects of cannabinoids like THC by facilitating their passage through the blood-brain barrier.

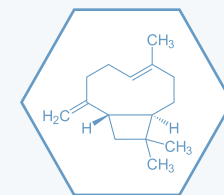

**Limonene**

**Aroma & Flavor:** Fresh citrus, lemon, orange with a slightly sweet and tangy note.

**Effects:** Natural antidepressant, anxiolytic, anti-inflammatory, energizing, and stimulating.

**Uses:** Reduces stress and anxiety, improves mood, boosts the immune system, and supports digestion. It can also enhance the absorption of other active compounds in the body.

**Caryophyllene**

**Aroma & Flavor:** Peppery, spicy, woody with earthy notes and sometimes a slight sweetness.

**Effects:** Powerful anti-inflammatory, analgesic, anxiolytic, neuroprotective.

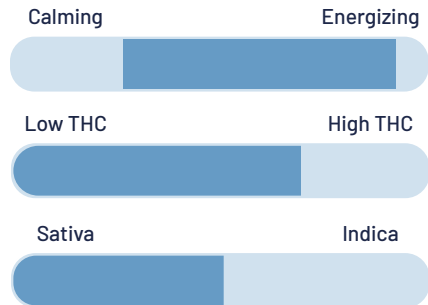

**Uses:** Relief from chronic pain, reduction of inflammation, helps with anxiety and stress, potential neuroprotective effects against degenerative diseases.

# Chemmy Jones

Type of Cultivation: Greenhouse

## 24%-26% THC

**Chemmy Jones** is the result of crossing two well-known strains: Chemdawg x Casey Jones.

### Parent Strains :

#### 1. CHEMDAWG

**Genetics:** It is a balanced hybrid, although some variations may lean towards indica or sativa dominance.

**Characteristics:** Chemdawg is famous for its strong chemical and diesel aroma, with earthy and spicy notes.

#### 2. CASEY JONES

**Genetics:** Sativa-dominant, contributing to its stimulating effects.

**Characteristics:** This strain is characterized by its sweet and citrusy aroma, with an earthy touch. Its effects are energizing and euphoric.

**Primary Notes:** **Chemmy Jones** presents a complex aroma that combines elements from its parent strains. The predominant scent is a mix of Chemdawg's chemical and diesel notes, complemented by Casey Jones's citrusy sweetness.

**Secondary Notes:** Earthy and spicy nuances are also perceived, with a hint of pine and floral freshness.

**Inhalation:** Upon Inhalation, users experience a strong chemical flavor with diesel and spicy notes.

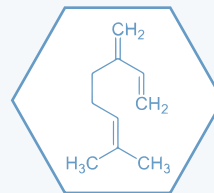

**Exhalation:** Upon exhalation, the flavor becomes smoother and sweeter, with citrusy and earthy notes leaving a pleasant and lasting aftertaste.

# Super Lemon Haze

Type of Cultivation: Indoor

25 - 27% THC

**Super Lemon Haze** is a sativa-dominant hybrid born from the legendary cross of Super Silver Haze and Lemon Skunk. Its highly resinous buds, vibrant terpene profile, and clear, uplifting high make this strain a multi-award-winning classic.

### Pharmaserv

Super Lemon Haze is part of Pharmaserv, a carefully selected line of premium strains that meet GMP (Good Manufacturing Practice) standards and benefit from full traceability through the GID system. Each strain in the collection ensures outstanding consistency, top-level indoor cultivation and a precisely balanced aromatic profile.

**Super Lemon Haze** features a bright, citrus-forward aroma reminiscent of ripe lemon zest and sour candies. This sharp freshness is gently balanced by warm, herbal undertones inherited from its Haze lineage. The result is a crisp, invigorating scent with naturally uplifting properties.

**Super Lemon Haze** captivates with an intense bouquet of fresh citrus notes reminiscent of lemon candy, complemented by warm, slightly herbal undertones from the Super Silver Haze lineage. Upon consumption, it reveals a distinctly fruity and refreshing flavor profile.

# Flowers

# Gary Payton

Type of Cultivation: Indoor

### 24 - 26% THC

**Gary Payton** is a balanced hybrid resulting from the cross between The Y and Snowman. Its dense, resin-rich buds reflect the high standards of indoor cultivation. This strain stands out for its strong effects and complex terpene profile.

### Pharmaserv

Gary Payton is part of Pharmaserv, a carefully selected line of premium strains that meet GMP (Good Manufacturing Practice) standards and benefit from full traceability through the GID system. Each strain in the collection offers exceptional consistency, high-end indoor cultivation, and a complex, precisely defined aromatic profile.

**Gary Payton** offers a balanced scent with earthy and spicy notes, a hint of dried fruit sweetness, light citrus accents and subtle herbal undertones. A refined and stable aromatic profile suitable for pharmaceutical applications.

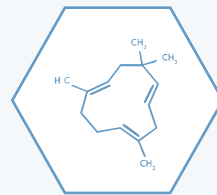

**Gary Payton** combines earthy and spicy notes with a subtle sweetness and citrus accents. Upon consumption, it reveals a rich and complex flavor profile, rounded out by herbal nuances and a hint of fruitiness. A layered and unmistakable sensory experience.

## DOMINANT TERPENES

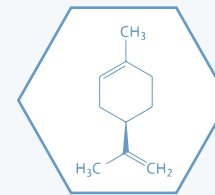

Humulene

**Aroma & Flavor:** Earthy, woody, and subtly spicy with herbal undertones and a dry, slightly bitter finish.

**Effects:** Anti-inflammatory, analgesic, mildly sedative, and appetite-suppressing.

**Uses:** Helps reduce inflammation and pain, supports physical recovery and relaxation, and may counteract appetite stimulation caused by certain cannabinoids. It also contributes to the overall balance of complex terpene profiles.

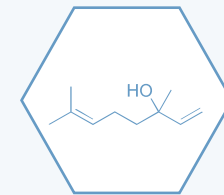

Limonene

**Aroma & Flavor:** Fresh citrus, lemon, orange with a slightly sweet and tangy note.

**Effects:** Natural antidepressant, anxiolytic, anti-inflammatory, energizing, and stimulating.

**Uses:** Reduces stress and anxiety, improves mood, boosts the immune system, and supports digestion. It can also enhance the absorption of other active compounds in the body.

Linalool

**Aroma & Flavor:** Floral, soft, and slightly spicy with hints of lavender and a subtle citrus undertone.

**Effects:** Anxiolytic, sedative, analgesic, and anti-inflammatory.

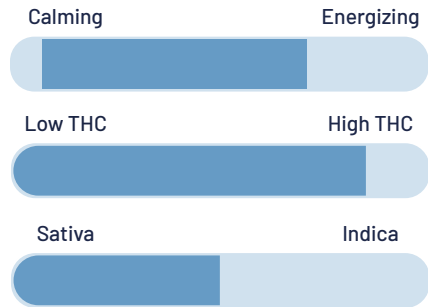

**Uses:** Helps reduce anxiety and stress, promotes relaxation and sleep, eases pain and inflammation, and may enhance mood. Often studied for its role in calming the nervous system and supporting mental well-being.

# Lemon Cherry Gelato

Type of Cultivation: Indoor

23 - 25% THC

**Lemon Cherry Gelato** is a sativa-dominant hybrid derived from Sunset Sherbet, Girl Scout Cookies (GSC) and MAC. This strain blends fruity, creamy and floral aromas with a balanced yet potent effect. Its dense, resin-rich buds reflect top-tier indoor cultivation, making it ideal for relaxing afternoons or evenings.

**Pharmaserv**

Lemon Cherry Gelato is part of the Pharmaserv selection, a carefully curated line of premium strains that meet the highest quality standards. Each genetic profile reflects exceptional consistency, expertly managed indoor cultivation, and a precisely developed aromatic profile.

**Lemon Cherry Gelato** delivers a smooth blend of citrus, cherry, and creamy vanilla, balanced by subtle earthy and spicy notes. The result is a pleasant, stable flavor profile suitable for pharmaceutical applications.

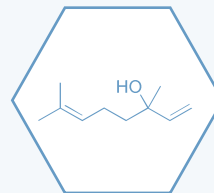

**Lemon Cherry Gelato** combines intense citrus and cherry notes with a creamy sweetness. Upon consumption, it reveals a rich flavor profile reminiscent of lemonade, vanilla, and fresh cherries, subtly rounded out by a hint of earthy spice.

# Tropicana Cherry

Type of Cultivation: Indoor

16 – 18% THC

**Tropicana Cherry** is a sativa-dominant hybrid created by crossing Tropicana Cookies with Cherry Cookies. Originally developed for the emerging Thai market, this strain stands out with its exceptionally fruity aroma and a clear, activating effect. Its dense, resin-rich buds feature a strongly expressive terpene profile.

### Pharmaserv

Tropicana Cherry is part of Pharmaserv, a carefully curated line of premium strains developed under strict pharmaceutical quality standards. Each strain in the Pharmaserv collection guarantees consistent quality, high-level indoor cultivation, and a precisely refined aromatic profile.

**Tropicana Cherry** presents a bright, fruity aroma combining ripe cherry and citrus zest, subtly supported by earthy and nutty undertones. The result is a clean, balanced aromatic profile, suited for pharmaceutical applications.

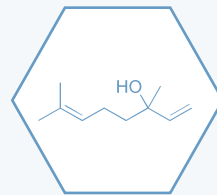

**Tropicana Cherry** offers a vibrant aromatic profile combining ripe cherry and sweet-tart citrus notes, subtly balanced by an earthy, nutty undertone. Upon consumption, it delivers a lively and refreshing flavor, where fruity brightness meets a layer of spicy depth, in line with Pharmaserv's commitment to aromatic precision and sensory quality.
